***Request for Continued Examination***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/19/2008 has been entered. An action on the RCE follows:

Claims 1, 2 and 13 are amended. Thus, claims 1-27 are pending. The applicant's remarks see pages 9-11 with respect to the amendment have been fully considered, the previous rejections stand withdrawn.

***Reason for Allowance***

Claims 1-27 are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Forest et al. (US 5,703,436) teaches that the double-side OLED display device which provides the illumination of red, green, and blue lights to the only one-side substrate.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest that claim 1 recited the limitation "wherein luminescence passing the first electrode and the first transparent substrate and luminescence passing the second electrode and the second transparent substrate are the same in a [red] color coordinate, wherein luminescence passing the third electrode and the first transparent substrate and luminescence passing the fourth electrode and the second transparent substrate are the same in the [green] color

Art Unit: 2629

coordinate, and wherein luminescence passing the fifth electrode and the first transparent substrate and luminescence passing the sixth electrode and the second transparent substrate are the same in the [blue] color coordinate” along with other limitation of claim 1.

Claim 2 recited the limitation “wherein luminescence passing the first electrode and the first transparent substrate is used for displaying an image on a first display surface, wherein luminescence passing the second electrode and the second transparent substrate is used for displaying the image on a second display surface, and wherein transmitted light of three colors transmitted through each the two color filters form approximately the same triangles in a color coordinate as for both luminescence passing a first electrode and luminescence passing a second electrode” along with other limitation of claim 2.

Claim 13 recited the limitation “two color filters which sandwich the light-emitting element of white; and wherein luminescence passing the first electrode and the first transparent substrate is used for displaying an image on a first display surface, wherein luminescence passing the second electrode and the second transparent substrate is used for displaying the image on a second display surface” along with other limitation of claim 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
